

Myers Pickups ~ The Master Elite

Thank you for your order! We appreciate your business. We hope you find hours of enjoyment and that this product meets and exceeds your expectations. At MYERSCO, we are committed to your complete satisfaction. **If, for any reason, you are not satisfied, please contact us at myersco@me.com or call us at 714-900-0176.** Please give us the opportunity to resolve any issue before leaving any negative feedback online.

**How to get the best sound from your Myers Pickup?
Please go to our support page at myerspickups.com/support
for all sound issues such as low gain and/or feedback.**

The Master Elite pickup system is the complete package! This multi-faceted collection of components gives you the ability to transform this single pickup into almost every style that we offer! Easily switch between multiple microphones, attachments and accessories to give you complete control of your instrument(s) and sound.

Your Master Elite arrives COMPLETE. There is nothing you need to do but mount it to your instrument and plug it in. The lithium battery is already installed and ready to go. The included battery should give you hundreds of playing hours. The battery needed for your pickup is a coin cell CR1220 and can be purchased at myerspickups.com or almost any electronic and discount stores where batteries are sold. Please remember to **UNPLUG** your cord when not playing to preserve the battery life. There is a miniature switch inside the jack that is activated when the cord is inserted.

To view a video on how to replace the battery please go to myerspickups.com/support.

Mounting your Myers Pickup

Before mounting your pick-up on your instrument, test your pickup by plugging it in and speaking into the miniature microphone element on the end of the micro gooseneck. Your voice should be loud and clear. If not, check the battery. Sometimes in transit, the battery becomes loose and all you need to do is reinstall it. After you have tested your pickup, now it is time to place it properly on your instrument. Experiment with different locations for the sound you desire. Most people prefer to have the pickup element about 1/2" from the sound hole or wherever the sound is produced. Once you have determined where to place your pickup, the next step is to mount it.

The Grip Suction Cup Mount

The Master Elite comes with the Grip Suction Cup Mount. Simply screw the (1) large suction cup in the center hole on the bottom of the preamp module. **IMPORTANT: Please place both washers (included) on the brass threaded stud of the suction cup before screwing in place.**

The Grip Clamp Mount

The Master Elite comes with the Grip Clamp Mount. Separate the (2) elbows from the clamp assembly and then screw the (2) elbows into the side of the preamp module in the tapped holes on the jack side. When elbows are in place vertically positioned, screw the barrel nuts in place. **IMPORTANT: Place additional felt/padding/cork (included) where needed on the bottom of the preamp module and metal clamp lip to protect your instrument before mounting to your instrument**

The Grip Bass/Cello Package Mount

(see separate sheet)

The Feather Saddle-Clip and Suction-Mini Mount

(see separate sheet)

The Feather Clip

The Feather Belt Clip

The Master Elite includes a belt clip. Mount the belt clip to the back of the preamp box with the "VHB" (very high bond) two-sided tape included. Keep in mind which way you want the direction of the cable to determine the best placement on the clip for you being a right-hand or a left-handed player.
